COMPX TIMBERLINE REMOVABLE LOCK PLUG SYSTEM

- Wide Selection of Locks to Fit Most Furniture & Cabinet Applications
- Available in Several High Quality Finishes
- Removable Lock Plugs For Complete Keying Versatility

**Lock Plug + Cylinder Body = Assembled Lock**

All Timberline locks consist of two separate components: a Lock Plug, and a Cylinder Body. A Change Tool (D500KY, see page 7) is required to remove lock plugs from the cylinder bodies.

Most Timberline locks are designed for mounting in 3/4” panels, with or without a veneer or laminate face. Most Timberline locks are used in a 16.5 mm hole (drill bit C165DB available, see page 7). Optional bezels are available (see page 7) that allow use of locks in holes from 3/4” to 7/8” in diameter.
