

CompX *RegulatoR*

Keyless locking made easy!

Electronic push button cabinet locks can be installed easily on new or retrofit applications.

Self-locking and manual locking are available on both vertical and horizontal versions of RegulatoR.

RegulatoR with self-locking

RegulatoR with manual locking

The RegulatoR is available in two versions: **self-locking** and **manual locking**.

Self-locking features **SlamCAM**, a spring loaded latch, which allows the user simply to close the cabinet door or drawer – **no need to return the knob to the locked position**.

Manual locking version, which uses existing CompX National cams, requires users to rotate the knob into the unlocked and locked positions.

.....

Features:

- ◆ 75,000 cycles; extended battery life reduces maintenance costs
- ◆ Batteries are accessible from **outside** the cabinet
- ◆ For applications up to 1-7/16" material thickness
