

CompX eLock®

revolutionizing *electronic access control*

The CompX eLock® - a keyless, standalone, electronic access control lock for cabinetry, refrigerators, freezers and incubators.

eLock keypad unit mounted on storage cabinets

eLock horizontal mount, membrane keypad unit on a freezer

eLock temperature monitoring unit on a refrigerator

cabinet version

The CompX eLock® for cabinetry can be used in various applications; drug cabinets, supply cabinets, key control boxes, medical & personnel records, patient chart enclosures.

refrigerator/freezer/warmer version

The CompX eLock® kit for appliances mounts externally and can be used in almost any application - pharmacies, nurse's stations, research labs . . . wherever access control and/or audit trail is needed or required.

temperature monitoring version

The CompX eLock® with temperature monitoring is the only product that offers security and the ability to record temperature, while providing audit trails for access attempts and temperature logs.

other features include:

Use existing identification cards. The CompX eLock® reads magstripe Track 2 and HID® cards, eliminating the need to buy new cards.

Manage eLocks and users with LockView® software.

CompX eLock® meets Joint Commission requirements!
