- Grade 2 cycle test minimum requirements: 20,000
- Grade 2 Bolt Strength Load requirements: 250 lbf

Certified products provide purchasers with quality assurance. When you buy or specify certified products, you know that you are investing in products that are independently tested and graded to assure you that they will do their job.

The certification process consists of three steps:

1. **Rigorous testing**
   An independent lab/testing facility must perform follow up tests prescribed by the product standard, for cabinet locks, the standard is ANSI/BHMA A156.11-2019

2. **Evidence of compliance**

3. **Follow-up testing and auditing**
   All Grade 1 and Grade 2 BHMA certified locks are available in the CompXpress program & with Advantage PLUS+ feature.

CompXpress Special Keyed Pin Tumbler Locks **shipped next business day**. Master keyed, keyed alike in groups. All locks are WI approved.

Refer to the CompX National catalog for packaging and the Architectural Specification Guide for more information. 26D – dull chrome available in the CompXpress program. Other finishes ship in five business days from two locations: Rancho Cucamonga, CA & Mauldin, SC.

ADVANTAGE +PLUS™ Re-Keying Made Easy — Allows users to remove the cylinder while the lock remains in place. NO mounting screws need to be removed. Simply use the 5/64" Allen wrench from the back to remove the cylinder for re-keying.
