StealthLock))) ®

1st Keyless, Invisible
Cabinet Locking System

Perfect for wood applications in Education, Healthcare, Office and other areas

- ◆ Radio frequency technology permits the Transmitter Pad to be stored anywhere, leaving no trace of visible hardware or signs of being secured

- ◆ Allows multiple (individually accessible) wood cabinet doors or drawers to be locked from a single transmitter pad within 15 ft. range

- ◆ Easy to install – takes fewer than 10 minutes

- ◆ Replaces existing cabinet locks

StealthLock® – an innovative keyless cabinet lock operated by radio frequency technology.

Features & Functions

- Transmitter pad operates within a 15 ft. range

- One transmitter pad can activate an unlimited number of receiver latches

- Separate user and supervisor codes (four to eight digits) to operate the lock(s)

- Receiver latch is easily programmed by user through the transmitter pad

- Receiver latch mounts within ½" drawer suspension clearance

- Uses readily available batteries: 4-AAA (not included) for the receiver latch and a CR2032 coin battery (included) for the transmitter pad

- Low battery indicator on transmitter pad and receiver latch

- For interior use only – recommended temperature range of 50˚F to 120˚F

Example:
**To lock a two-door system using one transmitter pad, one SL-100 and one RL-110 are needed.**

Applications*

- Healthcare cabinetry
- Lockers
- Closet cabinets and storage
- Kitchen cabinets, liquor cabinets, entertainment units
- Office furniture
- Reception & Conference furniture
- Retail display cabinets
- Audio visual cabinets

Versions available

- Standard – Allows any transmitter pad to operate any receiver latch. Standard mode can be used in most general office or residential applications.

- Dedicated – This factory programmed feature mates a transmitter pad to a receiver latch or latches by way of a unique transmitter ID. Ideal for assigned lockers or when users are within close proximity of each other.

Modes available on both versions

- Self-Lock Mode – Allows the user to program the Receiver Latch to automatically re-lock after unlocking.

- Passage/Manual Lock Mode (factory default) – User must manually lock.

- Single Use Mode – Allows the user to choose their code at time of operation. Single Use Mode is recommended for shared or day use lockers or cabinets.
