

One transmitter pad controls all openings!

StealthLock®

Keyless, invisible cabinet locking system

The keyless solution for closet projects

- ◆ Radio frequency technology permits the Transmitter Pad to be stored anywhere, leaving no trace of visible hardware or signs of being secured
- ◆ Easy to install - takes fewer than 10 minutes
- ◆ Allows multiple (individually accessible) wood cabinet doors or drawers to be locked from a single transmitter pad within 15 ft. range
- ◆ Power choices: battery (default); optional 120VAC power adaptor or emergency power jump
